

## iWeb

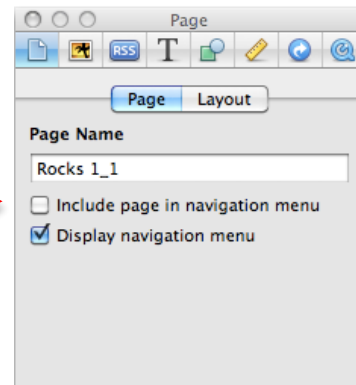

Adding a page, link to pages in your site, & hide pages in the Navigation bar

1. Start by adding a Blank page. Think of this page as a Table of Contents. Put a title on your page and in your Navigation bar.
2. Add a text box with the title of your unit, lesson and activity.
3. Create another page based on the technology. (Blank, Album, Movie, etc.) Title this lesson on the page and in the Navigation bar.  
(Suggestion: abbreviate the title, this page will not be seen.)

4. Click on the Inspector.

5. Make sure the page you created for your lesson and activity is selected in your Navigation bar. Remove the check in front of Include page in navigation menu.

6. Return to your Science "Table of Contents" page. Click once on the text box with your Unit, Lesson, Activity.

7. Go to the Inspector and select the Link tab.

With the text box , selected put a check in Enable as a hyperlink and next to Link To: choose One of My Pages.

Click on the drop down menu next to Page and select the page to which you want to link.

This will link your text with the page you created. If you want to test the link, put a check in the box in front of Make hyperlinks active and click on the link.
